AQUID ALI DHANDU

Email: aquidali.dhandu@gmail.com | LinkedIn: linkedin.com/in/aquid-ali | GitHub: github.com/Aquid-ali
Location: Mangalore, Karnataka, India | Expected Graduation: June 2027

EDUCATION

Canara Engineering College, Mangalore - Bachelor of Engineering in Computer Science and Design
CGPA: 8.3 / 10.0 | Graduation: June 2027
Relevant Coursework: Data Structures, Algorithms, DBMS, Operating Systems, Computer Networks, OOP

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript
Frontend: React.js, HTML5, CSS3, Tailwind CSS, Vite
Backend: Node.js, Express.js, Flask, REST APIs
Databases: MongoDB, Mongoose, MySQL
Cloud & DevOps: AWS fundamentals, Docker, Kubernetes, Terraform, CI/CD, GitHub Actions
Tools & Platforms: Git, GitHub, Postman, Linux, VS Code, VMware

FEATURED PROJECTS

1. DETRAN - AI-Assisted Ransomware Detection System
Stack: React, Python, Flask, YARA, ClamAV, Shannon Entropy Analysis
- Built multi-stage file scanner evaluating signature matching (YARA/ClamAV) and entropy density.
- Evaluated threat indicators to detect packed and encrypted malicious payloads.

2. Cloud-Based Pharmacy Inventory & Medicine Availability System
Stack: React 18, Vite, Tailwind CSS, Node.js, Express.js, MongoDB, Mongoose, JWT
- Implemented role-based access for admins, pharmacists, and clients with batch-level expiry alerts.

3. AI-Powered Customer Churn Prediction System
Stack: Python, Scikit-learn, Pandas, NumPy, Data Visualization
- Engineered ML classification pipeline achieving calibrated risk probability scoring.

4. Full-Stack Employee Management System
Stack: MongoDB, Express.js, React, Node.js
- Developed responsive administrative portal for personnel CRUD operations and departmental workflows.
